

Hello Animal Health Of Australia,
I teach Senior VCE Agriculture and Horticulture at Mount Lilydale Mercy College.
We have a free range poultry area at school and a deep litter area.
Animal Ethics has required us to fill in applications to have poultry at school.

I would like to see a separate section in your document for Research and Teaching purposes. It seems like the draft is prepared with commercial enterprises in mind. I have had multiple questions that I need to address and found it difficult at times to source information.

For example

1. How many birds can we keep at school?
2. Can we carry birds 50 metres down a hill to the orchard?
3. What do we do with fertilised eggs if we don't want to hatch them?

A section for schools and teaching would be great.

regards

--
